

Danielle Crevecoeur

| Austin, Texas 78758 | (203) 832-7568 | crevecoeurdanielle@gmail.com | [LinkedIn](#) |

Education:

Georgia Institute of Technology, M.S in Computer Science - Human Computer Interaction

January 2026 - Present

University of Connecticut, B.S.E in Computer Science and Engineering - Cybersecurity

August 2019 - May 2023

Work Experience:

Dell Technologies, Engineering Rotation Program:

Software Engineer II - User Interface Engineering, Experience Design Group

December 2025 - Present

- Serving as a technical lead in a design-led organization by improving design-to-development workflows, leading AI tool adoption, onboarding cross-functional team members, and exploring AI-driven workflow optimizations to improve team efficiency. Contributing to development and prototyping of UX and AI experiences for Alienware Command Center. Creating user flows, prototypes, and workflow concepts for an Agentic AI UX team, collaborating with designers, researchers, and engineers to explore future Agentic AI interactions across Dell products.

Software Engineer II, Automation Developer - Dell Pro AI Studio

January 2025 - December 2025

- Built software that allows users to integrate advanced AI capabilities into personal computers/Dell AI PCs. Developed tests for AI model plugins. Created new tests, enhanced existing ones, and identified gaps in coverage. Identified bugs to ensure high-quality and reliable performance.

Software Engineer I - Windows IoT

July 2024 - January 2025

- Resolved bugs and customer issues for Wyse Easy Setup and Wyse Device Agent for Dell's Thin Client (TC) product line. Enhanced test coverage/reliability for a crypto library through unit testing. Leveraged Gen AI to refine Dell's TCs

Software Engineer I - Global Packaging Engineering

July 2023 - July 2024

- Led AI and digitization discussions as a technical lead to modernize Dell's packaging strategy Program managed and co-designed a centralized data management application, translating user needs into workflows and requirements while aligning UX, engineering, sustainability, and legal stakeholders, saving ~800 engineering hours annually. Developed tools and dashboards for EPEAT 2025 data collection to automate reporting and enhance product visibility, enabling secure ODM input and cross-functional adoption. Spearheaded a sustainability initiative to repurpose fashion waste (and reduce the use of a non-biodegradable product widely used at Dell) into sustainable packaging and tech accessories.

Dell Technologies: Software Engineering Intern - Security Solutions x2

May 2021 - Aug. 2022

- Utilized ML and AI to develop a vulnerability prevention tool to strengthen security across Dell, protecting the organization, its products, and customers from potential cyber threats.
- Built a security POC enabling remote debugging via USB-C without opening the chassis, reducing shipping costs and time. Contributed to a signing service for payload authorization and digital signature validation.

Coeur LLC: Operations & Technology Lead

December 2025 - Present

- Leading all tech-driven operations for a first-of-its-kind made-in-America leather goods startup, offering bold products using traceable leather sourced from local farms practicing regenerative agriculture. Establishing structured systems for managing company-wide documentation. Driving adoption of AI-powered tools and workflows across different business functions including website development, and operational planning. Enabling faster execution and process automation.

Edlyft: Computer Science Student Support Mentor and Calculus II Tutor

August 2023 - January 2024

UConn's Engineering Diversity & Outreach Center (EDOC):

Student Worker, Program Coordinator, Counselor

Aug. 2019 - May 2023

- Worked as an admin assistant for office operations. Led planning and instruction for STEM outreach, largely to inspire young girls to pursue STEM. Coordinated school registration and communication. Delivered hands-on engineering and coding instruction through prepared lessons, videos, fun activities and workshops.

UConn's School of Engineering: Teaching Assistant, ENGR 1000: Orientation to Engineering

Aug. 2020 - Dec. 2020

Technical and HCI Skills:

Visual Studio, VS Code, Devin AI, Generative AI, Vibe Coding, Prototyping, HTML, JavaScript, React, Vite, CSS, Figma, Python, Java, C, C++, C#, XAML, Unity Engine, NUnit, PyTest, Jenkins, Power Bi, Stakeholder Management, Smartsheet, Adobe Suite, Human Subjects & User Research (IRB/CITI Trained), Human-Centered Design, Wireframing

Extracurriculars, Volunteer Experience, Awards, and Activities:

President of Dell Recent Grad Book Club, Member of Dell's Black Networking Alliance and Women in Action, Dell Diversity Recruitment Rep for NSBE & AfroTech Conferences, and Dell Grad Gives Volunteer for Local Elementary Schools (2023-Present). Leader for UConn Engineering Ambassadors and National Society of Black Engineers.
